

Legendary Sony audio expertise, built in

From home theatre systems to HiFi components, mini systems to boom boxes, headphones to iPod speaker docks, and voice recorders to Walkman MP3 players, Sony continues to develop its heritage in audio to deliver the best possible sound quality to audiophiles.

Bring the theatre home

Watch 3D movies in stunning HD surround sound with a 3D compatible Blu-ray home theatre system. Whether it's the BDVE370 with built-in WiFi and BRAVIA Internet Video, or the more powerful 1000W RMS BDVE870, to the BDVE970W with S-AIR wireless speaker kit supplied, there's a 3D home theatre system to match your 3D BRAVIA TV.

Fuel the party

Experience big sound in any room with Sony's new 'TANK' mini system (RDRHGTKI), with 220W total RMS power, built-in iPod dock, and a design as bold as its sound.

Music everywhere

Sony's portable audio range for summer 2010 is all about enjoying music wherever you are, whether that's on the beach or having a picnic in the park. The colourful new E450 series Walkman features a big-time battery life of 50 hours of music playback on a single charge. For those who want to block out the world, there's the S750 series with built-in noise cancellation – ideal for travellers.

Functional style, renowned sound

The new PIQ range features five distinctive styles that make a bold and unique fashion statement. Drawing inspiration from artists, skaters and urban street culture, PIQ headphones are meticulously designed with great attention to style, Sony sound quality, performance and comfort.

Unbelievable clarity & range

Music lovers who want the best audio quality in a streamlined and attractively-priced system now have just what they have been asking for. The heart of the RDPX50iP is a specially designed digital amplifier and long-stroke driver units capable of delivering 20W + 20W RMS – in other words, real room-filling power. Unlike other similar iPod docks, it features minimal sound distortion even when the volumes are high. This speaker system looks as good as it sounds, with a restrained, minimalist design that is hugely versatile and will harmonise with virtually any interior.

Capture ideas, lectures and more in digital quality

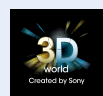

The new UX series voice recorder lets you capture more than ever with a microSD/M2 card slot. And no more straining to make out the words, with the Intelligent Noise Cut function that minimises external noise.

BLU-RAY KEY TECHNOLOGIES

3D in full HD 1080p

Whether you're ready to embark on the future of 3D entertainment or just want to watch movies in glorious Full HD 1080p, the BDPS570 & BDPS770 3D Blu-ray Disc players are the perfect solution.

x.v.Colour

Cinematic sound

Picture quality is only half the story when it comes to High Definition. The increased capacity available on Blu-ray discs lets you experience uncompressed audio in up to 7.1 channels of surround sound through a compatible Home Theatre System. Sound tracks can be stored as bit-for-bit recreations identical to the studio master, offering unprecedented clarity and detail. With new HD audio sound tracks available only on Blu-ray; movies sound better on Blu-ray.

3-Second quick start mode & fast loading time

Be entertained in as short as 3 seconds. With the Quick Start mode and fast disc loading time, Sony Blu-ray Disc™ Players are fully operational in no time. Very little waiting and less power consumption than previous models.

The easy-to-use menu

Have fun, fast and quick access to set-up menus and user controls. With the Xross Media Bar™ onscreen display, navigation is swift and smooth. The directional control Interface in the Xross Media Bar™ allows easy navigation and quick access to all your entertainment.

BDPS370

Expand your entertainment

Enjoy Blu-ray Disc movies in Full HD 1080p and improve the quality of DVDs to near HD via HDMI™ with the slim BDPS370 Blu-ray Disc player. Play your movies faster than ever or connect to the internet with BRAVIA Internet Video for instant access to a variety of internet video entertainment. You can also download the free BD Remote app and turn your iPhone® or iPod touch® into a remote control. This free versatile app lets you search for additional entertainment or access detailed information about the movie you're watching

Features

- Multi format disc playback (BD/DVD/CD/SACD)
- BRAVIA Internet Video
- DLNA (Photo, JPEG)
- Wi-Fi Adapter Ready
- Dolby TrueHD internal decoding and bitstream output via HDMI
- Precision Cinema HD Upscale DVDs to 1080
- iPhone/iPod touch remote control
- Gracenote® Metadata Service
- BRAVIA Sync
- BD-Live (Bonus Content Downloads) and Bonus View
- XMB (XrossMediaBar)
- 3 second Quick Start Mode & Fast Loading Time
- Front USB input for content playback or keyboard connection

BDPS570

Best of both worlds

Whether you're ready to embark on the future of 3D entertainment or just want to watch movies in glorious Full HD 1080p, the BDPS570 3D Blu-ray Disc player with built-in Wi-Fi is the perfect solution. Wirelessly connect to your home network and instantly access a variety of internet video content with BRAVIA Internet Video. Quick Start/Quick Load lets you begin enjoying your entertainment faster than ever. Plus, create the ultimate at-home 3D viewing experience when you pair this 3D Blu-ray Disc player with a BRAVIA® 3D HDTV.

Features

- ▲ Blu-ray 3D Full HD 1080 playback
- Multi format disc playback (BD/DVD/CD/SACD)
- BRAVIA Internet Video
- DLNA (Photo, JPEG)
- ▲ Built-in Wi-Fi
- Dolby TrueHD & DTS-HD Master Audio internal decoding and bitstream output via HDMI

- iPhone/iPod touch remote control
- Gracenote® Metadata Service
- BRAVIA Sync
- BD-Live (Bonus Content Downloads) & Bonus View
- XMB (XrossMediaBar)
- 3 second Quick Start Mode & Fast Loading Time
- Front USB input for content playback or keyboard connection

BDPS770

Endless entertainment

The BDPS770 is Sony's stylish flagship Full HD 3D Blu-ray player. With BRAVIA Internet Video wirelessly stream the very best content from the internet. You can also turn your iPhone® or iPod touch® into a remote control by downloading a free app. This free versatile app lets you search for additional entertainment or access detailed information about the movie you're watching. In addition to a stunning monolithic design to match your BRAVIA 3D HDTV, this Blu-ray player also comes with backlit remote control.

Features

- Blu-ray 3D™ Full HD 1080 playback
- ▲ Monolithic design
- Multi format disc playback (BD/DVD/CD/SACD)
- BRAVIA Internet Video
- DLNA (Photo, JPEG)
- Built-in Wi-Fi
- Dolby TrueHD & DTS-HD Master Audio internal decoding and bitstream output via HDMI
- Precision Cinema HD Upscale DVDs to 1080
- iPhone/iPod touch remote control
- BRAVIA Sync
- 3 second Quick Start Mode & Fast Loading Time
- ▲ Backlit remote control

DVPSR200PB

DVD Player

Featuring a compact, dustproof design, the DVPSR200PB will handle all your DVD needs.

Features

- Multi Disc Playback DVD/CD/MP3/JPEG
- Precision Drive 3
- Progressive Output (480p)
- Multi Brand TV Remote
- Multi disc resume
- Compact dustproof design
- Composite or Component DVD output

DVPSR700HB

Midi DVD Player with HDMI & USB

The midi sized DVPSR700HB DVD player features DVD upscaling to 1080 via HDMI and DivX, JPEG and MP3 playback via USB.

Features

- DVD/CD/DivX Player
- PhotoTV HD
- BRAVIA Sync
- DVD 1080p Upscaling
- HDMI Output
- Midi Slim Size
- MP3, JPEG, DivX, AAC, WMA, LPCM, MPEG-1 (USB)

RDRHX780

160GB Hard Disk Drive DVD/HDD Recorder

The RDR-HX780 DVD and HDD recorder features a 160GB HDD, HDD Cam Connection and x-Pict Story which allows you to create slideshow with music and burning into a DVD.

Features

- 160GB HDD Capacity
- BRAVIA Sync
- HDMI Output with 1080p Upscaling
- Mosquito Video Noise Reduction
- Rec Mode (HDD)
- HDD/DVD Fast Playback
- MP3, JPEG, DivX, Video CD/SVCD Playback

HDMI upscaling

Another advantage of HDMI is its ability to deliver upscaled video to your HDTV. Sony Blu-ray and DVD models with the HDMI upscaling logo convert Standard Definition DVD images to High Definition before they reach your HDTV, improving the picture quality to near HD quality 1080p. Sony's unique Precision HD upscale, technology using bi-pixel sampling for greater accuracy and the highest level of detail. This is particularly evident on diagonal lines.

MUST OWN BLU-RAY MOVIES

HOME AUDIO KEY TECHNOLOGIES

BRAVIA sync

Open up a new world of connectivity and entertainment simplicity by taking full control of your entire system with a single remote commander and BRAVIA Sync. All connected devices can sync and communicate with one another for seamless and intuitive operation via one dedicated BRAVIA Sync button on the remote control. Connectivity, simplicity, performance.

One touch system power: Simply press the power button on your remote to switch on or off multiple AV products including your TV, Blu-ray player, HDD Recorder and Home Theatre System.

One touch play: Press play on your remote and BRAVIA Sync will change the channel on your TV for Blu-ray or DVD playback.

One touch theatre control: Ideal for watching movies, press the orange button on the remote and the picture settings on your BRAVIA TV are set to Cinema Mode as tuned by Sony Pictures engineers in Hollywood and movie sound tracks will also switch to your Home Theatre System.

USB makes it easy

USB record & play

The REC to USB Direct button lets you rip tracks straight to your USB-enabled music device without needing a PC. Or play songs from your USB device just by plugging it in. And with folder and file names of tracks saved on your device, you'll never have to guess song information again.

USB movie playback

Digital movie downloads encoded in DivX and MPEG4* can easily be enjoyed on select Sony Home Theatre Systems using the USB Movie Playback function. Simply transfer the file to a USB storage media, plug it in and play the movie it's that simple!

*MPEG Simple Profile encoded files

HDMI upscaling

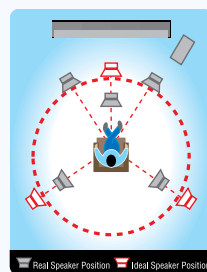

Home Theatre Systems equipped with HDMI output not only provide the convenience of one cable BRAVIA Sync connectivity and functionality but they also have the ability to improve DVD picture playback by upscaling the images to near HD quality 1080p. Sony's unique Precision HD upscale technology uses bi-pixel sampling for greater accuracy and the highest level of detail, this is particularly evident on diagonal lines.

Select models can even convert all incoming signals from any connected source before upscaling and outputting via HDMI to your HDTV for added convenience and performance.

Recreate perfect cinema acoustics

Turn your room into the ideal listening environment with Sony Digital Cinema Auto Calibration (D.C.A.C.). Simply run the auto calibration, the result is great cinema sound, whatever the size or shape of your room and placement of speakers in under a minute.

3D immersion

Breakthrough 3D technology and Sony's 3D Active Glasses deliver a visceral sensation with overwhelming depth – the effects are staggering. You don't just watch it, you live it. 3D technology displays high speed synchronized left and right-eye images to deliver the most immersive 3D experience imaginable. And since each frame you see is shown at Full HD resolution, the 3D action comes alive with razor-sharp detail. The combination of a 3D source, 3D TV and Active Shutter glasses take you straight into incredibly life-like, smooth 3D scenes that literally jump out of the screen at you. Enjoy all the dynamic energy of a 3D cinema in your own home.

BIV – BRAVIA internet video

Stream Internet videos direct to your HDTV through Sony's Blu-ray Disc™ Players. With BRAVIA Internet Video, there is no need for additional cables or advanced Internet set-up, simply connect to the Internet using Sony's USB Wireless LAN Adapter.

BD home theatre systems with BRAVIA Internet Video give you access to a range of online content directly to your existing TV. Now there is no need to huddle in front of a small computer screen to watch clips on the internet. Switch on the TV, and relax on the couch while watching internet clips and controlling it through your home theatre system. With BRAVIA Internet Video, your television is now a true all-in-one entertainment centre. Get quick access to YouTube, Style.com, BlipTV, Singing Fool, and many more sites that will keep you entertained for hours on end.

- ▲ Bi-Amp capable
- ▲ Audio Decoding: DTS HD-MA/Dolby TrueHD/LPCM/Dolby Digital/DTS/DTS Neo:6/Dolby Pro Logic IIz
- ▲ BRAVIA Sync
- ▲ S-AIR Wireless Ready
- ▲ A/B, A+B speaker switching
- ▲ 3D Ready

S-AIR speaker technology - go wireless

Give your BRAVIA Home Theatre System the wire free treatment. The Sony S-AIR Wireless system removes the clutter of running wires from one side of your room to the other. Simply connect the rear surround speakers to the S-AIR receiver/amplifier and a clear audio signal will be sent from the main unit to the rear speakers.

The rear S-AIR amplifier also features a headphone socket so you can plug your headphones in and crank up your music or movies as loud as you want and enjoy them from the comfort of your favourite chair.

This technology is available in the HiFi component range in the STRDH710 and STRDN1010 receivers.

STRDN1010

7.1 Channel AV Receiver

Take your high-definition surround sound experience to the next level with the STRDN1010 7.1-channel Blu-ray Disc™ HiFi receiver. Enjoy 3D images while hearing sound closer to the way it was captured, plus improve image quality of non-HD video sources to HD using one convenient cable. You can also share your music in multiple rooms with wireless 2nd zone technology.

Features

- 595W RMS Power Output (85W x7, 0.09% THD)
- 3D Ready
- Full 1080/24p HDMI
- HDMI Input 3/Output 1
- Dolby® TrueHD and dts®HD
- Wireless 2nd zone audio
- Quick speaker set up
- Audio return channel
- Bravia Sync
- S-AIR wireless

▲ Denotes 'Step-Up' Feature

STRDA3600ES

7.1 Channel Network ES Receiver

Enjoy multi-room entertainment with Audio and Video to a second zone and audio to a third zone in your house. A powerful Faroudja DCDi video scaler handles analogue video up-conversion and up-scaling to 1080p minimising the number of connections to your TV and the need to change channels to watch various inputs.

Features

- 700W RMS Power Output (100 x7, 0.09% THD)
- ▲ Bi-Amp and Amp relocation capable
- Titanium Audio Digital Signal Processor
- ▲ Faroudja DCDi Video Scaler
- Audio Decoding: DTS HD-MA/Dolby TrueHD/LPCM/Dolby Digital/DTS/DTS Neo:6/Dolby Pro Logic IIx/Neural THX surround
- ▲ HD Digital Cinema Studio (HD-DCS) mode
- D.C.A.C.
- DM Port
- BRAVIA Sync
- HDMI repeater Input 4/Output 1
- Video up-converter to Component and HDMI
- Video up-scaling to Component and HDMI
- ▲ Video Down Converter to analogue
- ▲ 2nd Zone Audio & Video and 3rd Zone Audio
- A/B, A+B speaker switching
- 3D Ready

STRDA5600ES

7.1 Channel Network ES Receiver

If you're looking for superior sound and picture quality in your home cinema room, or throughout your house the STRDA5600ES is just the ticket. With new network features including access to SHOUTcast internet radio and DLNA, it boasts extensive connectivity and control functions. Combined with the latest sound and video processing technology, the STRDA5600ES is the first choice in home theatre.

Features

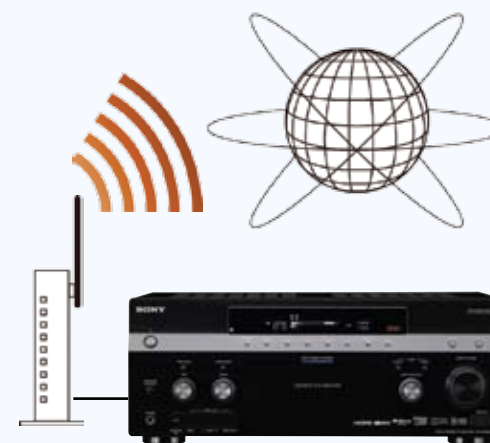

- ▲ 840W RMS Power Output (120 x7, 0.09% THD)
- ▲ Bi-Amp and Amp relocation capable

- ▲ HDMI Input 6/Output 2
- Video up-converter to Component and HDMI
- Video up-scaling to Component and HDMI
- Video Down Converter to analogue
- Discover more online at sonylearn.tv
- 3D Ready

Let a network solution enhance your entertainment experience

The Sony STRDA5600ES Receiver brings all your content together in one place and lets you enjoy hours of satisfying listening with the SHOUTcast Internet Radio.

DLNA is an industry wide initiative to facilitate the easy sharing and viewing of digital content between products on your home network. Easily access and stream video, photos and music stored in DLNA enabled PCs, NAS, Digital cameras, mobile phones and audio devices.

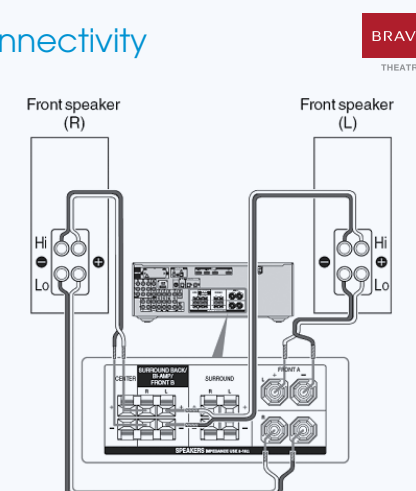

SHOUTcast is a directory of internet radio stations giving access to thousands of free online radio stations from DJ's and Broadcasters around the world without the use of a PC. The STRDA5600ES GUI displays individual genres and stations, and lets you preset favourite stations and operate internet radio the same way as current analogue radio. Whether it is duelling banjos or high energy dance music, there is a specialty station on SHOUTcast streaming it.

More channels, more options – Bi-Amp Connectivity

If you are about to purchase a Blu-ray player and are thinking of upgrading your amplifier to take advantage of the latest technologies, but are worried you may need to upgrade your 5.1 speaker package, fear not. Sony offers a range of connectivity and configuration options in its receivers that maximise audio performance in any configuration.

Sony's range of 7.1 channel amplifiers offer the ability to set up in 7.1, 5.1 and even 5.1 with Bi-Amp connection. Quality speaker packages allow the front speakers to be Bi-Wired or Bi-Amp'd for improved performance. A Bi-Amp'd speaker has two amplifiers connected to a single speaker. Each amp is focused on powering bass or treble to the speaker reducing the load on the amp and increasing performance. Simply connect, then select Bi-Amp in the Amplifier menu, run the Digital Cinema Auto Calibration (D.C.A.C.) and enjoy.

SCDXA5400ES

ES Super Audio CD Player

Super Audio CD player featuring new H.A.T.S (High Quality Digital Audio Transmission System) over HDMI to STRDA5600ES amplifier. The result is improved data flow and reproduction of soundstage, bass strength and detail for the ultimate listening experience.

Features

- ▲ High quality ES components and exceptional build quality
- ▲ Multi-channel Super Audio CD and Stereo Super Audio CD/CD Playback
- ▲ High Quality Super Audio CD conversion system
- ▲ Off Centre Insulator Feet
- ▲ Aluminium Front Panel
- ▲ Frame & Beam Chassis
- ▲ Twin R-core transformers
- Remote Control

PSLX300USB

USB

Turntable with USB Recording

Old school becomes new school with this USB stereo turntable. You'll be enjoying your classic vinyl albums on your modern Hi-Fi system in no time, or easily create MP3 files to store on a PC, burn to CD for the car or listen to on your portable player.

Features

- Full size Turntable
- Automatic operation
- Belt Drive
- 33.3 and 45 rpm speed settings
- USB output and PC software supplied for MP3 recording
- Pre-Amplified to enable connection via Aux input

Record revolution

Vinyl continues to sell due to its ability to reproduce musical recordings with a warm, rich sound. With the Sony PSLX300USB Turntable you can enjoy your vinyl collection in the comfort of your own home on your HiFi system. But for those who can't get enough of their favourite albums and want to listen to their unique vinyl collections on the go, they can simply connect the PSLX300USB to a PC and use the supplied Sound Forge software to create digital MP3 files. These digital recordings give you the versatility to transfer to your portable music player or CDs for music on the go. Then you can have the peace of mind to know that if the worst should happen and your precious vinyl gets scratched, it is safely archived.

Subwoofers

Your home theatre experience is incomplete without a superb subwoofer speaker that delivers deep rumblings of bass beats. With an integrated amplifier, our subwoofer speakers deliver low-frequency responses needed for a complete surround sound system.

Line-level and speaker level input allow you to hook it up with different home theatre set-ups and the advanced bass-reflex construction is made for maximum bass performance.

You shouldn't just hear the bass; you should feel it as well. Feel the ground move with Sony's Subwoofer speakers that let you enjoy every single beat of your favourite tracks or experience the dramatic sound effects from your beloved action blockbusters. The perfect companion to any Sony surround sound system. See sony.co.nz for more information.

Speakers

The finishing touch to your Hi-Fi sound system or Home Theatre is also one of the most important; so you're wise to choose Sony quality speakers.

For that extra edge, choose between floor standing speakers for high resolution audio, centre channel speakers for well-balanced Home Theatre, and stylish shelf speakers for compact convenience that don't sacrifice performance.

Pump up the volume with some serious sounds. See sony.co.nz for more information.

Speaker packs

Complete your sound system with high-fidelity sound from every angle. Sony's speaker packs are designed to bring out the best in Blu-ray and your home theatre package. Choose from a range of shelf and floor-standing speakers that will perfectly complement your sound system or Home Theatre, so you will always get the perfect sound for every occasion.

With the serious audiophile in mind, Sony audio components have been designed to provide outstanding performance from a highly-compatible configuration of your choice. See sony.co.nz for more information.

CMTEH15

Micro System

An affordable, easy to use all-in-one CD-Radio-Cassette audio system, ideal for the bedroom or kitchen.

Features

- 10W RMS Power Output (5W x2)
- Single Disc CD, Cassette Deck and Tuner
- Front Portable Audio input
- CD-R/RW MP3 Playback
- Top Loading CD Player
- DSGX Bass Boost
- 4 Preset EQ
- Single line LCD Display

CMTFX300i

Micro System with iPod* Dock

Easy to use Micro system with the added convenience of an iPod/iPhone dock and front audio input for all your digital music needs.

Features

- 10W RMS Power Output (5W x2)
- ▲ Single Disc CD, iPod and Tuner
- ▲ Integrated iPod/iPhone dock
- Front Portable Audio input
- CD-R/RW MP3 Playback
- Top loading CD Player
- DSGX Bass Boost
- 4 Preset EQ
- Single Line LCD Display

* iPod not included

Release your music

Don't let your favourite music stay trapped in your portable audio device. Sony's range of Micro and Mini Systems let you release your music via the front audio input or the built-in iPod/iPhone Dock.†

The simplest way to connect your portable audio device is via the front audio input. Connect the headphone output to the conveniently located front input and press play; then use the system remote to adjust the volume.

Alternatively those with an iPod or iPhone music player can take advantage of the in-built docks. Placing an iPod in the cradle enables the stereo to take control and lets you select albums, tracks and play modes from the remote. The systems will even charge the iPod when in standby mode so it's ready to go the next time you are.

CMTDX400

DVD Micro System

The CMTDX400 is the ideal all round system for all your music and movie needs. Perfect for entertaining in the bedroom or the bach.

Features

- ▲ 50W RMS Power Output (25W x2)
- ▲ Single Disc CD/DVD, USB and Tuner
- Front Portable Audio input
- ▲ DVD, CD-R/RW MP3, WMA, DivX, JPEG Playback
- ▲ Tray loading CD/DVD Player
- DSGX Bass Boost
- 4 Preset EQ
- ▲ Karaoke mic input and volume control
- ▲ Single Line FL Display

Make your mark

Don't settle for an ordinary, run of the mill iPod dock. Make your mark with the Sony RDHSK8iP iPod dock. Supplied with four graphic patterns designed by international artists and the ability to create infinite design variations of your own, this iPod dock will be as unique as your play list.

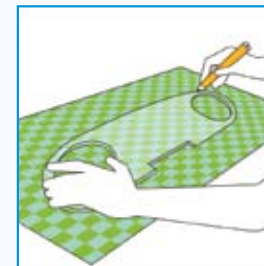

Meet the artists

Michael Table – Trading in his caps and spray cans for a squeegee and ink, Table transitioned from writing graffiti to designing limited edition rock posters. His hand printed posters combine his love of letterforms and typography with a handmade urban aesthetic.

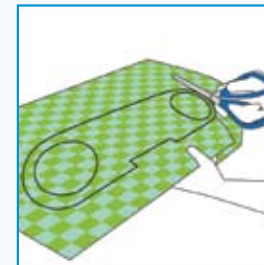

Patrick Haemmerlein – A native of Kinderhook, NY, Patrick found his way to Los Angeles in 2000. There he began to photograph the city and its components. Reflecting on the issues of the day, Patrick explores themes of nature vs. industry and how they can coexist or clash.

Goran Krstic – Goran Krstic is a 24-year-old NYC native and creative; having attended LaGuardia Arts High School and Pratt Institute. His design and illustration work is a product of his NYC upbringing, mashed together with his Serbian and Balkan heritage.

Angela Lauren – LA based, Angela Lauren's main passion and occupation is graphic design and illustration. She has had a fondness for drawing since she was a child. She is inspired by urban life, nature, music and people around her.

USB Record & Play

The REC to USB Direct button lets you rip tracks straight to your USB-enabled music device without needing a PC. Or play songs from your USB device just by plugging it in. And with folder and file names of tracks saved on your device, you'll never have to guess song information again.

The Sony MHCGR88 can record music from any source or input onto a USB device so you can digitise your old tapes or increase your music collection by recording your favourite new songs off the radio.

MHCGTR88
